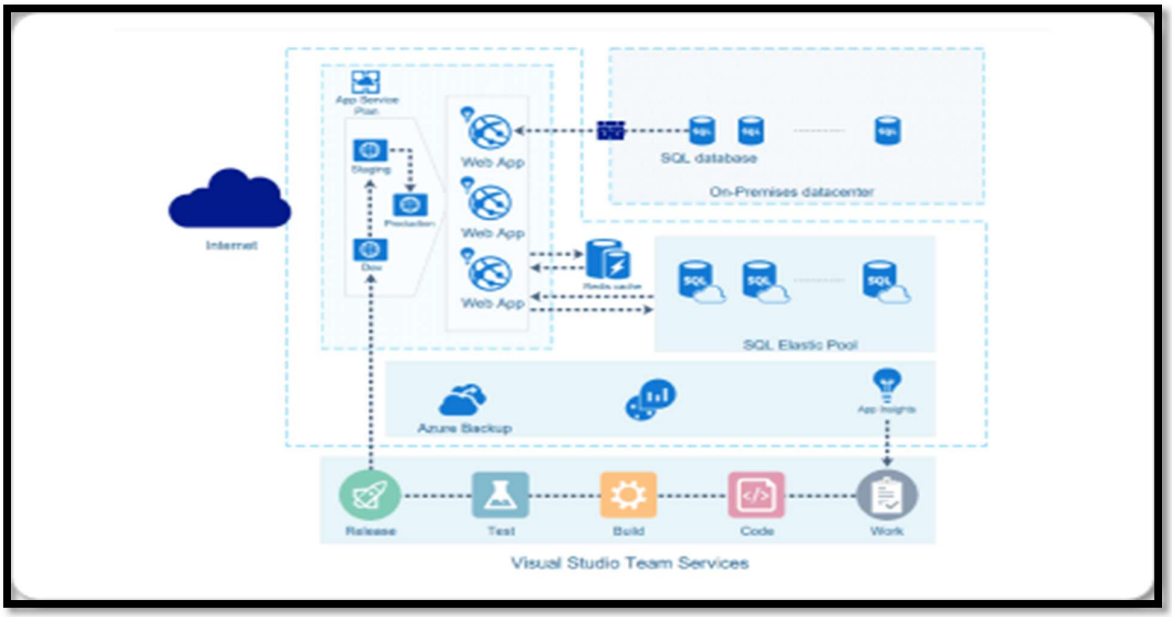
**Solution Architecture:**

Solution architecture for employee data automation focuses on designing a system that collects, stores, processes, and manages employee information efficiently. It bridges HR business needs with technology solutions like databases, cloud systems, and automation tools.

**Objectives :**

- Automate employee data entry, updates, and retrieval
- Ensure data accuracy and consistency
- Enable real-time access to employee information
- Improve reporting and analytics
- Ensure data security and compliance

**Benefits:**

- Reduced manual effort
- Improved accuracy


**Example** :
