Full Stack Development with MERN

Project Documentation format

1. Introduction

Project Title: Automating employee data

2. Project Overview

Purpose: Briefly describe the purpose and goals of the project. • Features: Highlight key features and functionalities.

3. Architecture

- **System Architecture:** A high-level description of how the frontend, backend, and database interact.
- **Database Schema:** Detailed design of MongoDB collections, including field names, types, and relationships.
- **Frontend Architecture:** Organization of React components, state management (e.g., Hooks or Redux), and routing.
- **Backend Architecture:** Structure of the Node.js/Express server, including middleware and controller organization.

4.Setup Instructions

Prerequisites: List software dependencies (e.g., Node.js, MongoDB). • Installation: Step-by-step guide to clone, install dependencies, and set up the environment variables.

5. Folder Structure

Client: Describe the structure of the React frontend.

Server: Explain the organization of the Node.js backend.

6. Running the Application

Provide commands to start the frontend and backend servers locally.

7. API Documentation

- End points
- Request/response

8. Authentication

Explain how authentication and authorization are handled in the project

9. User Interface

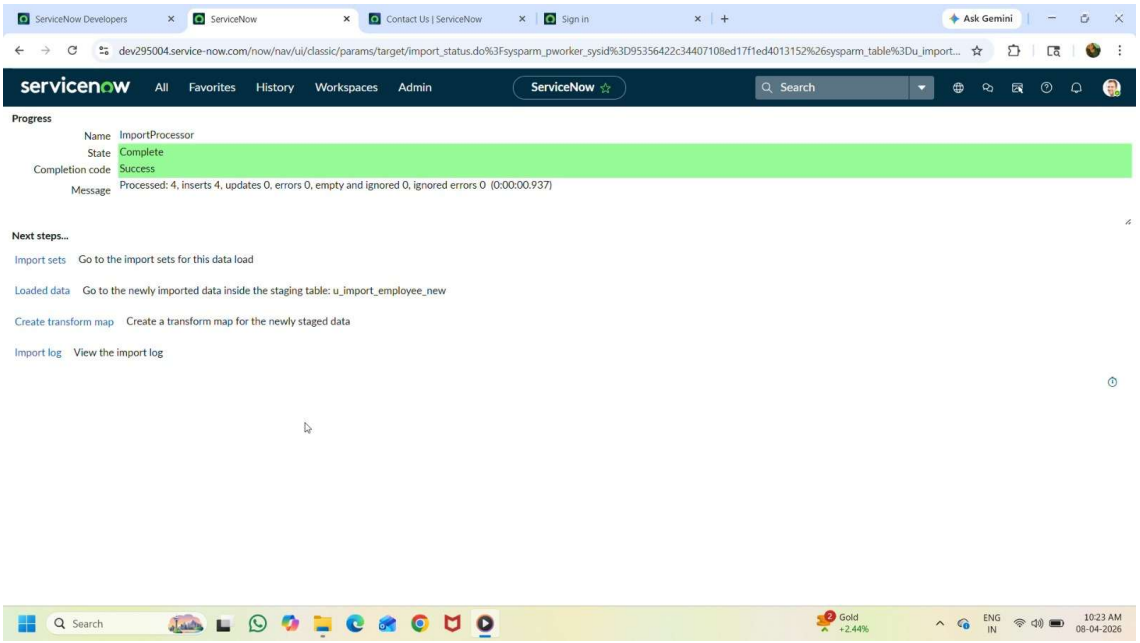
Provide screenshots or GIFs showcasing different UI features.

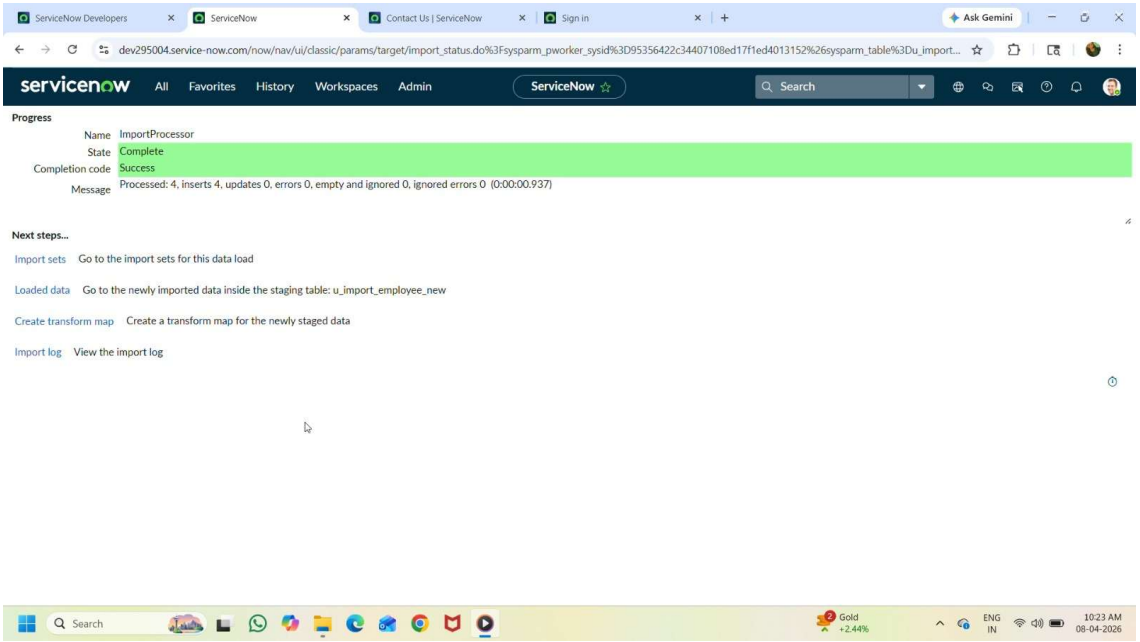
10. Testing

- Testing
- Development

11. Screenshots or Demo

Provide screenshots or a link to a demo to showcase the application.





12. Known Issues

Document any known bugs or issues that users or developers.

13. Future Enhancements

Outline potential future features or improvements that could be made to the project.
