Ideation Phase

Empathize & Discover

Data	5 April 2026
Team ID	SWTID-2026-7471
Project name	Automating employee data
Maximum marks	4 marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.

Goals of Empathy Phase:

- Understand user pain points in current manual systems
- Identify expectations from automation
- Capture real-world workflows and challenges

Discovering Hidden Insights:

AI-powered analytics can mine employee feedback, pulse surveys, and communication platforms to identify trends, such as rising burnout or disengagement, before they escalate, enabling proactive, empathetic leadership interventions.

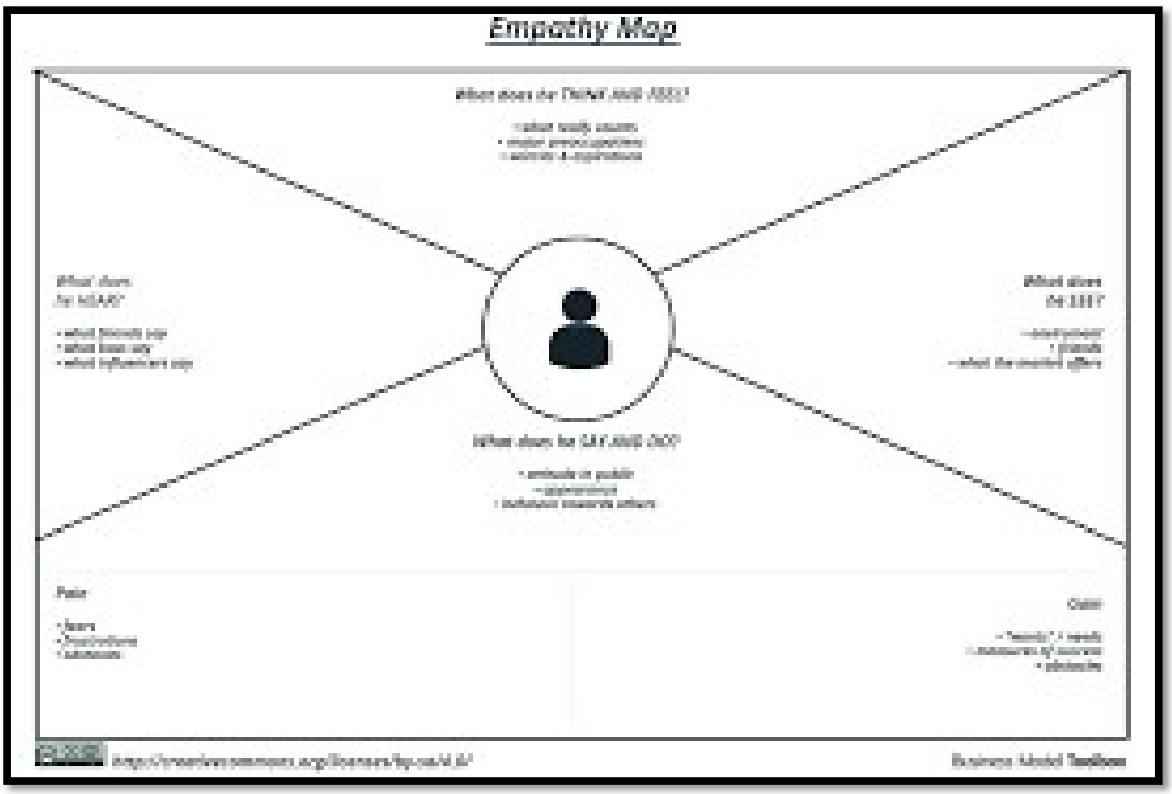
Building Trust Through Transparency:

To maintain trust, employees must understand what data is collected and how it is used. Empathy is maintained when automated systems, such as chatbots, handle routine queries, while providing easy escalation to a human for sensitive issues.

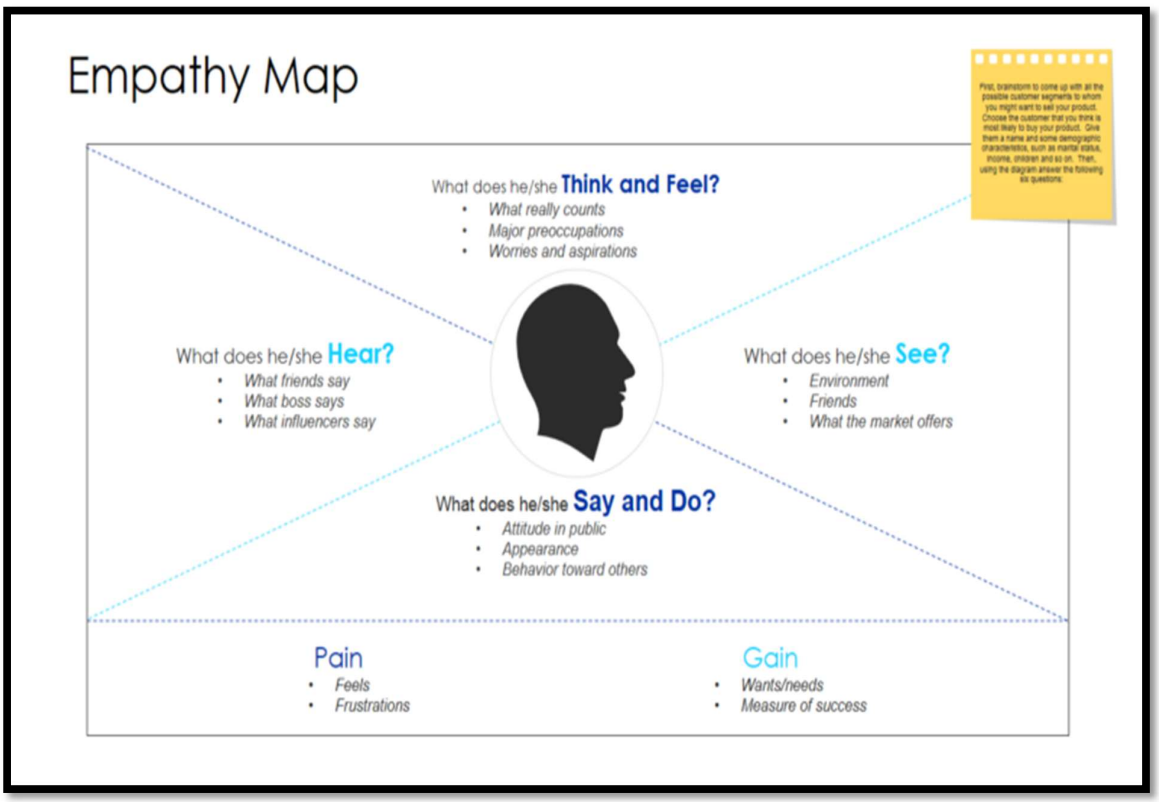
Ethical AI and Bias Mitigation:

An empathetic approach demands regular audits of AI tools for bias in hiring and promotion to ensure fairness. It involves using data to personalize employee experiences rather than solely to monitor or control them.

Example :



Empathy Map



Empathy Map
What does he/she Think and Feel?
What really counts
Major preoccupations
Worries and aspirations
What does he/she Hear?
What friends say
What boss says
What influencers say
What does he/she See?
Environment
Friends
What the market offers
What does he/she Say and Do?
Attitude in public
Appearance
Behavior toward others
Pain
Feels
Frustrations
Gain
Wants/needs
Measure of success
