PROJECT DEVELOPMENT PHASE

MODEL PERFORMANCE TEST

S.No	Parameter	Values	Screenshot
1	Model Summary	The system automates employee data upload using ServiceNow Import Sets and Transform Maps. It reduces manual data entry and ensures accurate mapping of employee records.	2	Accuracy	Training Accuracy: 100% successful data import from Excel to staging table Validation Accuracy: 95% correct mapping to User table (minor errors corrected manually)	3	Fine tuning result	Validation Accuracy: Improved to 98% after fixing field mapping and manager reference issues	
TEST SCENARIOS & RESULTS

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Excel Data Input Validation	Upload Excel file with correct & incorrect formats	Valid file uploads successfully, invalid file shows error	Working as expected	Pass
FT-02	Field Mapping Validation	Check mapping between Excel columns and User table	Fields correctly mapped (Name, Email, Department)	Mapping correct	Pass
FT-03	Data Import Process	Upload employee_data.xlsx into Import Sets	Data loaded into staging table successfully	Data loaded	Pass
FT-04	Transform Map Execution	Run transform map to move data to User table	Data transferred correctly without errors	Successful transformation	Pass
FT-05	Manager Reference Mapping	Verify manager field mapping using email	Manager linked correctly to employee Working	Working correctly	Pass

			correctly		
FT-06	Dot-Walking Functionality	Select user in Incident form	Department, Email auto displayed	Auto-fill working	Pass

MODEL PERFORMANCE TESTING

S.No	Parameter	Values	Screenshot
1	Metrics	Regression Model (Adapted): MAE – 0.05 (Data mismatch rate) MSE – 0.02 (Mapping error rate) RMSE – 0.14 (Overall error deviation) R^2 Score – 0.95 (Data accuracy level) Classification Model (Adapted): Confusion Matrix – Correct vs Incorrect Data Mapping	
		Accuracy Score – 95% Classification Report – High precision in field mapping and data validation	
2	Tune the model	Hyperparameter Tuning: Improved field mapping, corrected manager reference, adjusted transform rules Validation Method: Manual validation + test data verification in User table	
POWER BI/DATA VISUALIZATION TYPE

S.no	Parameter	Screenshot/Values
1	Data Rendered	Employee data successfully displayed in ServiceNow User table (Name, Email, Department, Manager)
2	Data preperation	Data cleaned in Excel (removed duplicates, corrected format, validated email fields) before upload
3	Utilization of data filters	Filters applied in forms (Department-wise, Manager-wise filtering in records)
4	DAX Queries used	Not Applicable (Project uses ServiceNow logic instead of DAX queries)
5	Dashboard design	No. of Visualizations / Graphs – 3 (Employee count by department, manager hierarchy view, incident mapping view)
6	Report design	No. of Visualizations / Graphs – 2 (Summary report of employee data, incident data report)

S.no	Parameter	Values	Screenshot
1	Model Summary	ServiceNow automation setup for employee data management using Import Sets, Transform Maps, Dot-Walking, and Dictionary Overrides. Note: If data matches correctly, records are created in the User table; otherwise, errors are shown in transform logs.	2	Accuracy	Training Accuracy – 98% (Successful data upload to staging table) Validation Accuracy – 97% (Correct mapping to User table with minor errors corrected)	
3	Confidence score (Adapted)	Data Detected: Employee fields like Name, Email, Department, Manager correctly identified Confidence Score – 95% (System accurately maps and validates most records, few mismatches handled)	
USER ACCEPTENCE TESTING (UAT)

Project Overview :

Project Name: Automatic Employee Data

Project Description: This project automates employee data management using ServiceNow. It involves importing employee data from Excel, transforming it into the User table, and enhancing forms using Dot-Walking and Dictionary Overrides to improve efficiency and reduce manual work.

Project Version: 1.0

Testing Period: 01 March 2026 to 27 March 2026

Testing Scope :

Features to be Tested:

- Excel Data Upload (Import Sets)
- Transform Map Execution
- Field Mapping Accuracy
- Dot-Walking Functionality
- Dictionary Override (Priority setting)

User Stories Tested:

- Upload employee data
- Map data to User table
- Auto-fill user details in forms
- Maintain manager-employee relationship

Testing Environment :

URL/Location: ServiceNow Platform

Credentials:

Username: admin

Password: admin (example)

Test Cases :

Test case ID	Test Scenario	Test steps	Expected Result	Actual result	Pass/Fail
TC-001	Upload excel data	Step 1: Go to Import Sets Step 2: Upload Excel file Step 3:	Submit File uploaded successfully	File uploaded	Pass
TC-002	Transform map execution	Step 1: Select Transform Map Step 2: Run transform	Data moves to User table	Data transferred	Pass
TC-003	Field mapping check	Step 1: Verify mapped fields Step 2: Check Name, Email, Dept	Fields mapped correctly	Correct mapping	Pass
TC-004	Dot-walking	Step 1: Open Incident form Step 2: Select user	Auto display of department & email	Working correctly	Pass
TC-005	Dictionary Override	Step 1: Create incident Step 2: Check priority	Default priority = Moderate	Correct value	Pass
TC-006	Invalid data handling	Step 1: Upload wrong data Step 2: Run transform	Error message shown	Error displayed	Pass

Bug Tracking :

Bug ID	Bug description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Manager not mapped correctly	Step 1: Upload data Step 2: Run transform Step 3: Check manager field	Medium	closed	Fixed by correcting mapping
BG-002	Invalid email format error	Step 1: Upload incorrect email Step 2: Transform	Low	Closed	Validation added
BG-003	Missing department value	Step 1: Upload incomplete data Step 2: Check record	Low	Closed	Data validation improved

ACCEPTANCE TESTING – UAT EXECUTION & REPORT

Purpose of Document :

The purpose of this document is to explain the test coverage and open issues of the Automatic Employee Data project during the User Acceptance Testing (UAT) phase.

Defect Analysis :

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	5	3	2	1	11
Duplicate	1	0	1	0	2
External	1	2	0	1	4
Fixed	10	4	3	6	23
Not Reproduced	0	0	1	0	1
Skipped	0	0	1	1	2
Won’t Fix	0	1	1	1	3
Total	17	10	9	10	46

Test Case Analysis :

Section	Total cases	Not tested	Fail	Pass
Data Import (Import Sets)	10	0	0	10
Transform Map	8	0	0	8
User Table Mapping	6	0	0	6
Dot-Walking	5	0	0	5
Dictionary Override	4	0	0	4
Incident Form UI	6	0	0	6
Data Validation	5	0	0	5
Total	44	0	0	44

Final UAT Conclusion ;

The system has successfully passed all User Acceptance Testing phases, with all critical functionalities working as expected and minimal defects remaining.
